

ERGOCOLD THERMO WALL

Secure the temperature with quality.

The ErgoCold wall is the market's leading solution for dividing transport into different temperature zones. Compared to the alternatives, the ErgoCold wall enables a sustainable solution that pays off in the long run. The patented robust construction ensures that the wall has the same insulation ability for several years after purchase. The wall is easy to maneuver and move in order to minimize energy losses.

The locking is integrated into the wall with fixed handles without loose parts. The locking is made towards the roof to avoid it being damaged by pallet forks during loading. Carrying handles makes the walls easy to lift and maneuver. The walls can preferably be placed along sidewalls when not in use. Surface material is made of fiberglass and stainless steel that makes the walls easy to wipe off and maintain a high level of hygiene when transporting food and medicines.

Advantages:

- Robust construction for best insulation and durability.
- Locking to ceiling for increased service life.
- Integrated handles without protruding parts.

Area of use:

Thermal wall for separation of temperature zones when temperature control and low consumption of refrigerant are required. Multitemp and long-distance transport with high requirements for hygiene and easy cleaning.

Design:

Swedish-made thermal wall in white reinforced glass fiber laminate with insulation material between the laminates in a 33mm thick sandwich construction. Details such as carrying handles, locking and protection plate in stainless steel. Locking bracket to ceiling with aluminum profile and rubber strip.

Maintenance and care:

Wipe off when wet to avoid discolouring and store indoors. Very durable for all types of cleaning and also high pressure washing.

Art. Nr.	Product	Dimensions	Color
20280210210	ErgoCold Thermal wall 2-section	210 x 210 cm	Vit
20280250280	ErgoCold Thermal wall 2-section	250 x 280 cm	Vit
20280250330	ErgoCold Thermal wall 2-section	250 x 330 cm	Vit

The ErgoCold wall comes in a various amount of measurements and can be tailor made for your vehicle
